

SPEECH DISORDER

NEWBORN AND INFANT FEEDING (0-3 YEARS)

BOTTLE FEEDING

If you notice any of the following situations with your baby or infant on a regular basis, talk with **your doctor, a speech therapist, an infant's nurse or a midwife.**

Turning away from the bottle and/or the nipple/pacifier

Skipping feeding

Reluctant to any type of nipple

Drinking very slowly

Refusing to switch from breast to bottle

Unable to latch the bottle's nipple
(tongue position, milk dripping)
